**SUBJECT: LIQUID ENVIRONMENTAL SOLUTIONS OF TEXAS, LLC
PROPOSED INCREASE IN THE MONTHLY PERMITTED
WASTE CAPACITY AT A PERMITTED MUNICIPAL SOLID
WASTE PROCESSING FACILITY LOCATED IN DALLAS,
TEXAS**

Dear Ms. Graham:

Liquid Environmental Solutions of Texas, LLC (LES) operates a permitted liquid waste processing facility located at 11115 Goodnight Lane, Dallas, Texas 75229. This facility processes nonhazardous grease trap, grit trap, and compatible liquid wastes. Wastewater is pre-treated from these waste streams and discharged to the City of Dallas sanitary sewer system in compliance with a discharge permit. Recovered materials are hauled off-site for beneficial re-use or disposal. No waste materials are permanently disposed of at this facility. Adjacent land use is predominantly industrial and commercial. Attached is a map showing the location of the facility.

LES is seeking an amendment to its Municipal Solid Waste Permit No. 2069, administered by the Texas Commission on Environmental Quality (TCEQ), to increase the monthly permitted grease trap waste receipts from 2.4 million gallons per month to 4.8 million gallons per month and to add additional treatment units to facilitate the additional waste processing. As a part of this permitting process, LES is seeking comment from the North Central Texas Council of Governments. In accordance with the TCEQ Municipal Solid Waste Rule at 30 TAC §330.61(p), please review the amendment of this permit for compliance with your regional solid waste plans. To facilitate your review, I have enclosed Parts I and II of the subject application. Additionally, the complete application can be accessed online at <http://www.liquidenviro.com/notices>.

Please provide any comments you may have to my attention at the Brown and Caldwell address above or by email at taylor@brwncald.com. If you have any
